

Design Rationale Document

Mobile-First Appointment Booking App for Dr Teeth Dental Care & Implant Centre

Project Overview

This project focuses on designing a mobile-first appointment booking application for Dr Teeth Dental Care & Implant Centre, a dental clinic offering consultation-based services. The objective is to simplify the appointment process for patients while improving operational efficiency for the clinic.

The design is created for real-world use, targeting both new and returning patients who need a fast, accessible, and reliable booking experience.

Problem Identification

Traditional dental appointment booking often involves phone calls during working hours, long waiting times for slot confirmation, difficulty tracking appointments, lack of visibility into doctor availability, and manual rescheduling processes.

Design Goals

1. Simplicity for First-Time Users
2. Reduced Booking Friction
3. Mobile-First Experience
4. Trust and Professionalism

Target Users

- Young adults seeking cosmetic dental care
- Working professionals with limited time
- Parents booking for children
- Senior citizens requiring regular dental checkups

User Journey Mapping

Open App → Login/Guest Access → Select Service → Choose Dentist → Select Date → Choose Time Slot → Review Booking → Confirm Appointment

Screen Design Decisions

- Guest login to reduce sign-up friction
- Service cards with duration and pricing
- Dentist preference option
- Calendar-based slot selection
- Confirmation summary screen

UX Principles Applied

- Progressive Disclosure
- Accessibility
- Error Prevention
- Visibility of System Status

Visual Design Choices

- Blue for trust and healthcare
- White for clarity
- Teal for highlights
- Poppins-inspired modern typography

Expected Business Impact

For the clinic: reduced manual work, improved scheduling, better retention.

For patients: faster booking, easy rescheduling, improved convenience.

Conclusion

The final design creates a practical, professional, and scalable appointment booking solution tailored for Dr Teeth Dental Care & Implant Centre.
